WHAT IS FLEURCO™SEKUR⁺

SAFETY PROTECTION

FleurcoSEKUR+ Safety Protection is a transparent film bonded directly onto the glass panel by means of an adhesive to improve safety by retaining the pieces together in the event of glass breakage.

What are the benefits?

FleurcoSEKUR+ Safety Protection film provides an added layer of security for you and your family. In the event of an accident, FleurcoSEKUR+ Safety Protection prevents the tempered glass door from shattering into thousands of pieces which could cause damage.

How is it applied?

Application is performed by a specialized machine. The film is always installed on the opposite face of our Microtek® glass protection.

How durable is it?

FleurcoSEKUR+ Safety Protection is very durable. It has been tested for long-term usage against chemicals and normal wear and meets the required standards.

How do I clean glass treated with it?

No abrasive materials should be used in cleaning a FleurcoSEKUR+ Safety Protection treated shower door. Cleaning with a damp cloth using a mixture of vinegar/mild soap with water is recommended.

FLEURCO™SEKUR⁺ WITH EZ Clean

SAFETY PROTECTION

EZ Clean is an innovative enhancement to the FleurcoSEKUR+ Safety Protection film. It applies a water-repellent coating directly on the safety film, making water bead and run off more easily and improving ease of maintenance. This allows the safety film side of the glass to face the interior of the shower, making previously non-reversible doors now fully reversible.

What are the benefits?

Doors with EZ clean no longer require a dedicated left or right side. The doors are now fully reversible which means door placement can be decided at the time of installation rather than choosing before ordering. This provides greater flexibility for customers & installers alike.

How do I clean glass treated with it?

We recommend the same cleaning method as any door with FleurcoSEKUR+ Safety Protection and Microtek®. No abrasive materials should be used.

Shattered glass maintains structure with
FLEURCOSEKUR⁺ SAFETY PROTECTION film

5
year limited
warranty

FLEURCO™ SEKUR⁺ WITH EZ Clean *

SAFETY PROTECTION

*5 year limited warranty

Microtek®
FLEURCO
Glass surface protection

WHAT IS FLEURCO™SEKUR⁺

SAFETY PROTECTION

FleurcoSEKUR+ Safety Protection is a transparent film bonded directly onto the glass panel by means of an adhesive to improve safety by retaining the pieces together in the event of glass breakage.

What are the benefits?

FleurcoSEKUR+ Safety Protection film provides an added layer of security for you and your family. In the event of an accident, FleurcoSEKUR+ Safety Protection prevents the tempered glass door from shattering into thousands of pieces which could cause damage.

How is it applied?

Application is performed by a specialized machine. The film is always installed on the opposite face of our Microtek® glass protection.

How durable is it?

FleurcoSEKUR+ Safety Protection is very durable. It has been tested for long-term usage against chemicals and normal wear and meets the required standards.

How do I clean glass treated with it?

No abrasive materials should be used in cleaning a FleurcoSEKUR+ Safety Protection treated shower door. Cleaning with a damp cloth using a mixture of vinegar/mild soap with water is recommended.

FLEURCO™SEKUR⁺ WITH EZ Clean

SAFETY PROTECTION

EZ Clean is an innovative enhancement to the FleurcoSEKUR+ Safety Protection film. It applies a water-repellent coating directly on the safety film, making water bead and run off more easily and improving ease of maintenance. This allows the safety film side of the glass to face the interior of the shower, making previously non-reversible doors now fully reversible.

What are the benefits?

Doors with EZ clean no longer require a dedicated left or right side. The doors are now fully reversible which means door placement can be decided at the time of installation rather than choosing before ordering. This provides greater flexibility for customers & installers alike.

How do I clean glass treated with it?

We recommend the same cleaning method as any door with FleurcoSEKUR+ Safety Protection and Microtek®. No abrasive materials should be used.

WHAT IS FLEURCO™SEKUR⁺

SAFETY PROTECTION

FleurcoSEKUR+ Safety Protection is a transparent film bonded directly onto the glass panel by means of an adhesive to improve safety by retaining the pieces together in the event of glass breakage.

What are the benefits?

FleurcoSEKUR+ Safety Protection film provides an added layer of security for you and your family. In the event of an accident, FleurcoSEKUR+ Safety Protection prevents the tempered glass door from shattering into thousands of pieces which could cause damage.

How is it applied?

Application is performed by a specialized machine. The film is always installed on the opposite face of our Microtek® glass protection.

How durable is it?

FleurcoSEKUR+ Safety Protection is very durable. It has been tested for long-term usage against chemicals and normal wear and meets the required standards.

How do I clean glass treated with it?

No abrasive materials should be used in cleaning a FleurcoSEKUR+ Safety Protection treated shower door. Cleaning with a damp cloth using a mixture of vinegar/mild soap with water is recommended.

FLEURCO™SEKUR⁺ WITH EZ Clean

SAFETY PROTECTION

EZ Clean is an innovative enhancement to the FleurcoSEKUR+ Safety Protection film. It applies a water-repellent coating directly on the safety film, making water bead and run off more easily and improving ease of maintenance. This allows the safety film side of the glass to face the interior of the shower, making previously non-reversible doors now fully reversible.

What are the benefits?

Doors with EZ clean no longer require a dedicated left or right side. The doors are now fully reversible which means door placement can be decided at the time of installation rather than choosing before ordering. This provides greater flexibility for customers & installers alike.

How do I clean glass treated with it?

We recommend the same cleaning method as any door with FleurcoSEKUR+ Safety Protection and Microtek®. No abrasive materials should be used.

Shattered glass maintains structure with
