LED TECHNOLOGY
Energy efficient and compatible with an optional wall dimmer

ALUMINUM FRAME
For easy installation

UL LISTED FIXTURE
All components and product pass all UL listing codes

5MM DISTORTION FREE GLASS
For quality and clarity

DEFOGGER PAD
Targeted area for fog free reflection

COPPER-FREE MIRROR
Prevents black edge corrosion

ACID ETCHED LIGHT BAND
Allows light to pass through mirror face

PENCIL EDGE
For clean look

WARM WHITE LIGHT
Best lighting for makeup and shaving

SAFETY FILM BACKING
For security

ON-OFF TOUCH SWITCH
Easily located

3500K WARM WHITE LIGHT

Kelvin (K) is a unit of measurement used to describe the hue of a specific light source. This is not necessarily related to the heat output of the light source but rather the color of the light output. Kelvin values below 3500K will have a warmer, yellowish hue. Values between 3500K and 4500K will be in the white hue range. All values higher than 4500K will tend to have a more bluish hue. The prominence of the hues will increase as the values move away from the white hue's range. Daylight typically falls into the 5000-6000K range.

Lumens (lm) is the measure of the total quantity of visible light emitted by a source.

Rely on UL, one of the world's leading independent product testing organizations, when you want to ensure that the luminaires and lighting system controls you buy and use in your environment are high performing, reliable and safe. When you look for quality, look for the UL Mark.
